Course Objective:- Micro economics is concerned with the behavior of individuals and firms in the production and distribution of scarce resources. It deals with the allocation of resources among different uses. The main objective of the course is to provide a sound understanding of the basic principles of micro economics and their application to real life situations. The course is designed to help students develop analytical skills and to understand the role of the market mechanism in the allocation of resources. The course is also intended to provide a foundation for further studies in economics and related disciplines.

Course Outcomes: - After completing the course, students should be able to:

1. Explain the basic concepts of micro economics and their application to real life situations.
2. Analyze the behavior of individuals and firms in the production and distribution of scarce resources.
3. Understand the role of the market mechanism in the allocation of resources.
4. Develop analytical skills and to understand the role of the market mechanism in the allocation of resources.

Pedagogy of the Course Work :

- Lectures
- Assignments

Instructions for Paper-setter and candidates:

- The paper is divided into two parts, A and B. Part A contains 10 questions and Part B contains 5 questions. Candidates are required to attempt all questions in Part A and any five questions in Part B.
- The duration of the examination is 3 hours.
- The total marks for the examination are 100.

SEMESTER-II
